

HOW TO AVOID A CANOPY COLLISION/ENTANGLEMENT

**When jumping with others,
break off in plenty of time**

**Look around to make sure not
close to others when deploying**

Get a good flat track and separation

Give a good wave off

**During deployment be ready to take
avoiding action using rear riser turns**

**Make sure you're in
clear skies before:**

Visor goes up

**Be on the lookout throughout
the entire canopy descent**

Stowing slider

Chest strap adjustments

**Maintain altitude
awareness
at all times**

Releasing steering toggles

Booties off

Stay safe
